Glossary

Completion Percentage Over Expected (CPOE)

The difference between Actual Completion % - Expected Completion % (xCompletion %). XCompletion % is calculated using variables: field position, yards to go, air yards, pocket cleanliness, etc..

EPA per Play (EPA) & CPOE Composite

Combines EPA and CPOE into a singular stat through a weighting process which best predicts EPA in the following season.

EPA per Play (EPA)

Measures the points a QB adds to their offense on a per play basis.

Pass Breakups (PBUs)

A play in which a defender manages to tip or knockdown the football without intercepting the ball.

Pro Football Focus Rank (PFF Rank)

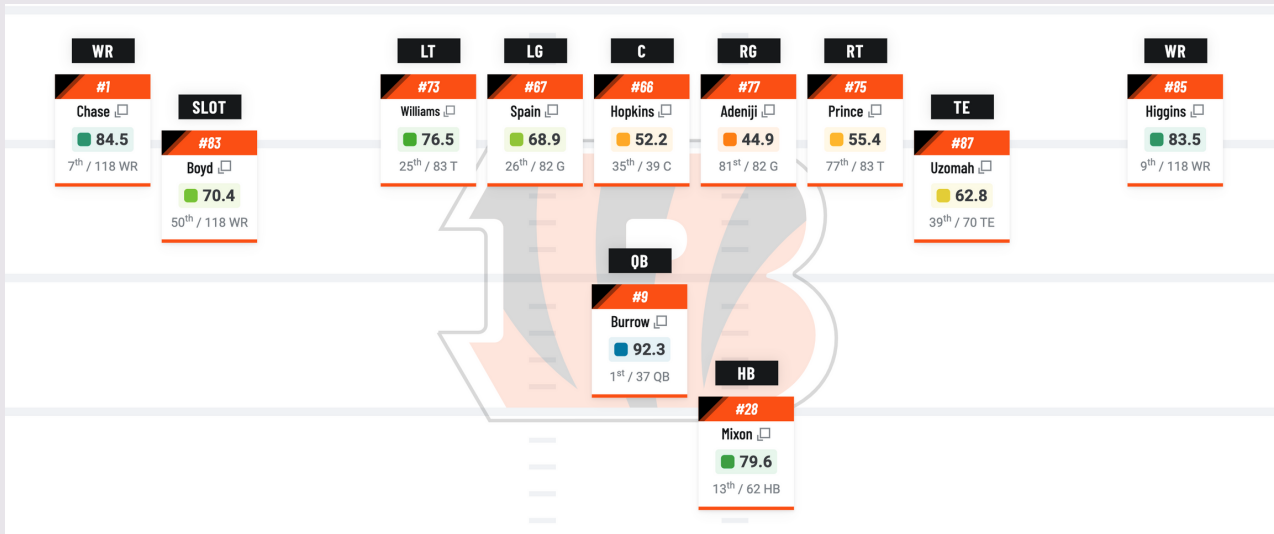

Each player is given a grade of -2 to +2 in 0.5 increments on a given play, with the +/- grades scaled to a 0-100 scale for comparisons across positions. For offensive players, their PFF-positional rank is provided, while defensive players include their grades for Defense, Pass Rush, Run Defense, & Coverage.

Offense

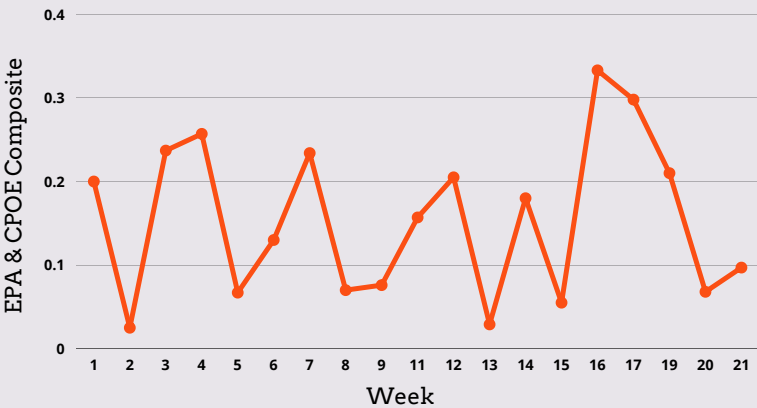

Quarterback: Joe Burrow

Regular Season Stats:

CPOE: 6.7 (1st) | EPA per Play: 0.186 (7th) | PFF Rank: 2nd/39
